

Berkley Parks & Recreation

The Crafty Scientist Classes

Parents & kids will love these engaging science and craft projects. Each themed class focuses on education with fun and creativity. Explore subjects such as earth science, oceanography, chemistry and more with our hands on approach to learning. Join us as we explode watermelons, craft wind socks, pollinate flowers and soar to new heights of knowledge and fun. Classes begin with a story that sets the theme for our experiments & projects.
