City of Berkley Kenmore and Cornwall Water Main & Pavement Replacement Project

Beginning the week of **May 1st, 2023** (weather permitting), the City's contractor, Aielli Construction Co., Inc, will commence construction to complete the remaining work on the Kenmore & Cornwall Water Main and Pavement Replacement Project. You may see construction equipment/materials in your area as the contractor mobilizes the week prior, beginning **April 24th, 2023**.

The remaining work on the project includes connection of the newly placed water main on Kenmore & Cornwall to the existing main in 12 Mile Road, removal and replacement of all sidewalks, the installation of the rain garden, miscellaneous punch list/repair items, and lawn restoration. The contractor plans to make the new water main connection first, followed by the sidewalk and rain garden work, and complete lawn restoration once all other construction items have been completed.

To the extent possible, disruptions in traffic will be minimized, and residents will have access to driveways during construction. Kenmore and Cornwall will remain open to traffic during construction; however, on-street parking will **not** be allowed on your street for the duration of the project.

Residents should mark or expose all sprinkler heads near their sidewalks to limit the potential for damage. To schedule repairs to irrigation systems damaged during the 2022 work, please contact Tom Cairo, the HRC field Observer, listed below:
